

Why Vacuum Package

Vacuum Packaging is a method of packaging that

removes oxygen from the bag or container prior to

sealing. Once the vacuum cycle is finished, the

package is professionally sealed, providing safe,

hygienic and tamperproof packaging.

GreenVAC Vacuum Bags

3 Unique vacuum bag types available in a variety of sizes.

PRESERVE

GreenVAC 'Preserve' bag series incorporates a new technology in how the product is layered, blown and stretched. It gives the film added strength, puncture resistance, higher clarity, provides better oxygen barrier while using 13% less plastic than a regular 3-mil vacuum bag.

The 100% recyclable GreenVAC Pure bag series is a multilayer barrier film that provides both high moisture and oxygen barrier properties. Our recyclable film has an innovative construction with a superior oxygen barrier and furthers our sustainable initiatives. 100% recyclable PE films formed into 3-side sealed vacuum pouches.

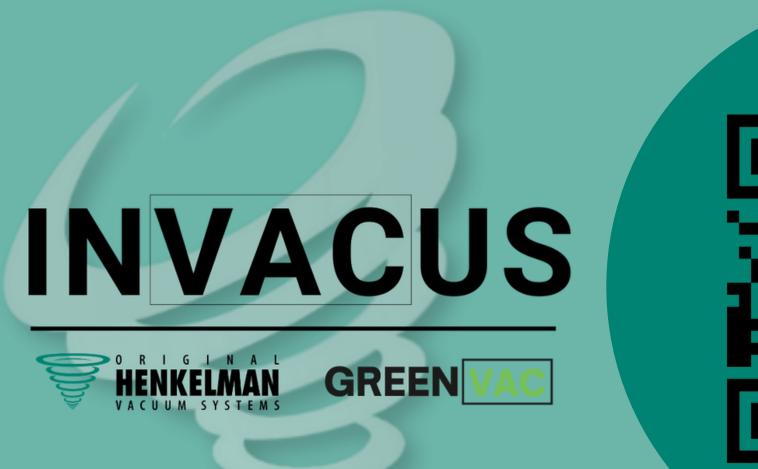

PERFORMANCE

GreenVAC 'Performance' series incorporates new technology in vacuum bags. This recyclable 2-mil/50u film delivers all the benefits of our Preserve & Pure products with additional features.

Additional Features

Self-Venting Easy-Tear Notches Microwave/Oven Safe Great for Grab N' Go

Vacuum Packaging fit for Foodservice
