FAQ:

Are there any performance differences between Natural finish v. DuraCoat™ Cast Coated bowls?

While both finishes are great for cold food storage and display, only non-coated or natural finish bowls can be used for hot food applications as well.

simply done...

Our Simple Solutions™ Buffet System is as easy to assemble as 1-2-3 to keep your cold storage presentations organized and help your operation perform more efficiently.

DROP-IN TEMPLATES

Place templates on the NSF-7 ledge inside your cold well unit. Each template is equal to one well. Per example above, a four well unit will need four templates. These templates rest slightly above the well floor and are perforated for maximum air flow circulation around our food bowls.

CAST ALUMINUM BOWLS

These vessels are the same size and capacity as traditional food pans or hotel pans. They are available in a variety of sizes: Full, Half Long, Half, Third, Sixth and Ninth size, so they are easy to configure inside your well. They should fit tightly together to retain cold serving temperatures. If there are gaps between bowls, slide all bowls in same direction then fill gaps with adapter bars as needed.

SPACER BAR KIT

Kit includes one of each bar: 0.25", 0.5", 0.75", 1", 1.25" and 2". Use individually to fill gaps at the end of your well or use in any combination to replace vessels for smaller food service; or create an alternative serving surface. Bars are manufactured to rest on the NSF-7 ledge inside your well and block cold air from escaping to optimize the efficiency of your unit.

Need help with your well configuration? Please contact your TableCraft sales representative.

Select single adapter bars are also available, see page 26 for more options.

PORTABLE INSULATED ICE WELLS (with or without Lids)

New Portable Insulated Ice Wells are essential additions to any self-serve line; perfect for indoor and outdoor events, buffets, hotels, restaurants, and cafeterias. Also works well as a stand alone beverage or individually packed goods cooler; keeping your food, drinks, or desserts chilled and ready to serve.

Our wells are constructed of fabricated aluminum—sealed, double walled with 1" thick insulation material to promote up to 3 hours of cold display while reducing the appearance of condensation. Non-slip feet affixed to the underside of the unit keep it in place on your serving line. Drain hole allows for easy emptying and clean up.

just add ice...

Our wells are constructed to fill and chill. Start with ice, then build to fit your needs. These short-term cold serving solutions will bring the cool to any indoor or outdoor buffet or catering event.

Add-in Simple Solutions™ Drop-in Template(s).

Note: Make sure ice level does not interfere with template resting on ledges inside well.

We offer a variety of Cast Aluminum Bowls. See opposite page for configuration options.

- Available in Single and Double Wells (with or without Lid) in Brushed (BRA) finish and Translucent Clear (TCL), Black (TBK) and Copper (TCP) coatings
- Custom options also available. To ensure a proper fit, provide dimensions and requirements to your TableCraft sales rep
- For Cold Serving Only, Keeps food chilled up to 3 hours*
- Add ice to the well. If using drop-in templates, fill ice up to the bottom of the template. Well will accommodate (1) drop-in template for single and up to (2) drop-in templates for double well
- If using Simple Solutions Cast Aluminum serving vessels, pre-chill the bowls in the freezer for 8 hours before use to minimize temperature changes
- Hand wash well with dish soap and warm water

SAFETY SHIELDS

FOR COLD WELLS

Finding solutions to modify current serving stations has become a must. By limiting the access to self-serve foods, contamination and health risks can be reduced for both staff and patrons. Adding shields or partitions can be more economical alternatives for restaurateurs and operators than remodeling serving and dining spaces. Our cold well acrylic shields with black metal frames are offered in 2, 3 or 4 well configurations. For custom requests, please contact your TableCraft sales rep.

- ¼" acrylic provides excellent clarity, cleanability and durability
- Light-weight, durable frame constructed of extruded metal tubing and plastic connectors
- Ships flat and assembles easily, no drilling or tools required
- Made to order and ship from Willis, TX location

TABLECRAFT RECOMMENDED CARE & USE FOR YOUR PRODUCTS

Acrylic

When cleaning your acrylic pieces, do not use abrasive cloths or paper towels. Always be sure to use a microfiber cloth to prevent scratching. To sanitize, use warm water mixed with sanitizing dish soap, Hydrogen Peroxide (3%-5% Concentration), or a bleach-water solution (2% Concentration of Bleach). To prevent damage to the surface of your acrylic shield, avoid using ammonia or alcohol based cleaners. Do not put in the dishwasher. Not microwave or oven safe.

Melamine

Dishwasher safe. Due to the size of some pieces, hand washing is best. We recommend to use a soft cloth and mild detergent, then towel dry. Not microwave or oven safe. Safe for temperatures up to 212°F/100°C.

Enamelware - Vitreous Porcelain Enamel Coated Steel

Enamelware is a time-honored traditional cooking and serving vessel that has been used for centuries in many ways. A good quality enamelware product can last for years under the right conditions and if cared for correctly. Just like any other porcelain piece in the market, porcelain enamel coated steel is not chip resistant and can become worn over the years. The steel substrate of the products is incredibly strong; however the porcelain coating is susceptible to chipping if handled roughly or repeatedly dropped on a hard surface.

To extend the life of your enamelware products, we recommend that you wash before use, do not use abrasive cleaning or scouring pads, do not place empty enamelware on heating element or allow to boil dry on induction unit, gas or electric hobs. Also, before use, coat with a light coating of cooking oil to protect the enamelware from staining. After use, to remove baked on food or stains, soak in warm soapy water and wash gently with non-abrasive liquid detergent.

Enamelware products are commercial dishwasher safe (high & low temp), induction and freezer safe, and safe for direct flame. Not microwave safe.

Porcelain

All pieces are dishwasher and microwave safe. We recommend to use a soft cloth and mild detergent, then towel dry.

Recycled Green Glass

Dishwasher safe. Due to the nature of recycled glass, it is common to notice bubbles and small lines in the finished product. These

characteristics are natural qualities of recycled glass — no two pieces are exactly alike. Not microwave or oven safe.

Stainless Steel

Dishwasher safe. For best results, we recommend to hand wash with a soft cloth and mild detergent, then towel dry immediately to maximize their beauty. Do not wash with harsh or abrasive cleaners. Do not allow product to soak in water for extended periods of time (will prevent rust). Not microwave safe.

Galvanized Steel

Hand wash with a soft cloth and mild detergent, then towel dry. Do not wash with harsh or abrasive cleaners. Do not allow product to soak in water for extended periods of time (will prevent rust). Not microwave safe.

Black Metal / Chrome Plated Baskets or Racks

Hand wash with a soft cloth and mild detergent, then towel dry. Do not wash with harsh or abrasive cleaners. Do not put in the dishwasher.

Polypropylene Baskets

Dishwasher safe (low temperature). Not microwave or oven safe.

Ridal Collection™ Baskets

Dishwasher safe (low temperature). Microwaveable for limited reheat use. Not oven safe.

Willow

For best results, we recommend to hand wash with a soft cloth and mild detergent, then towel dry. Do not wash with harsh or abrasive cleaners. Do not put in the dishwasher.

Polyethylene/Plastic Baskets

Dishwasher safe (low temperature), microwave safe (for reheat only) and heat lamp safe up to 150°F/65°C.

Polyethylene/Plastic Bottles

Dishwasher safe (low temperature). Not microwave safe.

Wood Products (bread boards, salad bowls, pepper mills, Acacia, Ashwood, Bamboo, etc.)

Hand wash with a soft cloth and mild detergent, then towel dry. Do not wash with harsh or abrasive cleaners. Do not put in the dishwasher. Do not let product soak in water for extended periods of time (prevents splitting).

Stainless Steel (Tri-Ply)

Stainless Steel cookware is dishwasher safe. However, we recommend hand-drying the cookware immediately after the rinse cycle or hand-washing and drying to preserve the original finish. Prolonged exposure to high heat settings may cause your cookware to discolor. To recondition your cookware or to remove stubborn spots and stains, use a nonabrasive pad and quality Stainless Steel cleanser such as Bar Keepers Friend®.

Cast Iron

Our line of Cast Iron is pre-seasoned, however it is still important to seal the surface of cast iron through a process called "seasoning". This makes the cookware less likely to stick, protects it from corrosion and rust, and prevents food from taking on metallic flavors. With proper care, a well seasoned pan will only get better with time and last for years. Wash the pan thoroughly in hot soapy water, then hand dry immediately. Using a cloth or paper towel, grease the pan thoroughly with a thin coating of vegetable oil or melted vegetable shortening. Be sure to coat the entire surface, including all corners. Heat the oven to 350°F (176°C). Place the cookware in the oven for 1 hour. Remove while hot and allow to cool to room temperature. Wipe away any excess oil, being careful not to scrub clean, then store. To preserve the seasoned finish, cast iron must be cleaned differently from other types of cookware. Cast Iron should never be placed inside a dishwasher or scrubbed with scouring pads or steel wool. Instead, wipe the pan clean with a sponge or dishcloth in hot water, without detergent. Any residue may be removed by boiling a little salt and vinegar in the pan, or by rubbing with a paper towel and coarse salt. Hand dry immediately after washing and brush with a thin coating of vegetable oil before storing. If stacking pans, place a paper towel between them. Pans should be seasoned from time to time when needed. Cast iron cookware is heavy and care should be taken when lifting; where available, use side handles for extra stability. Always use heat protection gloves as handles will become hot. Allow cookware to cool before cleaning. Cast Iron is not microwave safe.

Cast Iron

Rust? Don't Panic, it's not broken.

Without protective seasoning iron can rust. It's really easy to fix. Scour the rust, rinse, dry, and rub with a little vegetable oil. If problem persists, you will need to thoroughly remove all rust and follow our re-seasoning instructions.

Cast Aluminum–Natural

The "Naturals" are made of a food safe cast aluminum without coating and are NSF® approved. These items can endure temperatures from –20 up to 450°F. For best results, we recommend to hand wash with a soft cloth, then towel dry immediately to maximize their beauty. Staining will occur if acidic foods are put into the natural products.

Cold Serving Cast Aluminum–Coated

All Coated Cast Aluminum products are NSF® approved and will endure temperatures from –20 up to 195°F. (DO NOT BAKE in the coated cast aluminum products). If a defect in the coating appears, such as peeling or chipping, the product must be taken out of service immediately and repaired or replaced. The intended purpose of the color coated products is for cold serving & display only. They are not to be used in the preparation of food. Some environmental uses are, but not limited to, buffet lines, catered environments, and in food display cases. Do not cut directly on the products, as this will cause the coating to scratch. Do not put any of the products in an oven, on a stove top, under a heat lamp or in any other condition where the temperature exceeds 195°F. Washing by hand is recommended, but when using a non-caustic detergent, the coating is dishwasher safe. Do not clean with scouring pads. Only use nylon or sponge pads. Regular dish washing will dull the coating. Do not use metal utensils on the color coated products. NOTE: Staining of all color coated products will occur especially if used with acidic foods. The lighter (white, sky blue, and gray) colors are more likely to show stains than darker colors. Staining of products is not covered under warranty.

Aluminum

Not Dishwasher Safe. Wash by hand using a cloth, warm water, and dish soap. Dishwashing will cause discoloration of your aluminum kitchenware.
